

Quota Ownership 2006

This table sets out the quantity and percentage of quota for Sanford's top 100 stocks.

The colours used correspond with Sanford's view of the status of each stock on a 1 to 5 grading scale according to the key. The status of the fishery as recorded by the Ministry of Fisheries (Mfish) in its Plenary Report is also included. The final column shows the changes that have occurred since this table was published in last year's Sustainable Development Report.

Sustainability Status Sanford view key

| | | |
|---|--|-------------------------------------|
| 1 Quota reduction likely | 2 Has declined but is rebuilding | 3 Being sustainably utilised |
| 4 Under-exploited and could increase | 5 Quota too low and should be increased | |
